2020 Customer Spotlight

Established since 1997, RS Interior Renovations is a family run business which produces custom-made furniture, cabinets and other furnishings specializing in kitchen cabinets and walk-in closets. Melody started off her career in sales and then to better serve her customers she broadened her skillset to provide designs. Melody takes designing dream homes very seriously and 2020 Design has a huge part in helping her do so.

Working with 2020

Over 10 years ago, Melody first saw the potential in using 2020 Design software to help her create realistic designs rather than hand drawings. She has seen over the years how she has been able to maximize her time and efficiency with 2020 Design. Having their catalog content available in 2020 Design has helped increase productivity and allows for easy generation of pricing for the client. The real show stopper in Melody's opinion, is the ability to create realistic renderings. Clients are now fully able to visualize what their dream homes will look like. Working closing with her 2020 consultant in Malaysia, Ms. Chooi Chooi Wong of Twenty Twenty Design Solution, Melody has been able to become proficient in 2020 Design.

Advice to Designers

"I highly recommend 2020 Design to all designers," said Melody. "The ease of use and the ability to learn the software quickly means that you can maximize you time, increase profitability and delight your customers. It is well worth the investment. The realistic photo renderings are a real plus when showcasing your work."

About the Customer
