REAL WOOCOMMERCE STORES SUBMITTED BY THEIR MAKERS

## 2 Hounds Design

2 Hounds Design make stylish and comfy designer collars, harnesses, and leashes for dogs.

Founder, Alisha Navarro, has a background in theoretical and applied physics and never planned on starting a collar company as an outlet for her creative energy.

After numerous unsuccessful attempts to find a special **martingale collar** for her two retired racing Greyhounds, she invested \$500 in raw materials and decided to make her own.

What started out in 2003 as a one-woman show making collars in Alisha's spare bedroom has now grown into a team of over 50 talented professionals, all working together in a 20,000 square foot manufacturing facility in Indian Trail, NC.

2 Hounds Design practices lean manufacturing principles to drive continuous improvement and ensure that they are always proud to put their name on every collar, leash, and harness shipped.

A great deal of time has been spent researching and establishing relationships with suppliers, with a strong emphasis on materials sourced from the United States.

You'll find no mass-produced, generic collars here – only custom-made, cool, and creative dog collars for medium, large, and extra-large breeds. Careful attention has been paid to the safety, functionality, and comfort for your hound.

2 Hounds Design also works closely with adoption and rescue groups worldwide. They have raised more than \$500,000 in their first 10 years alone through fundraising, donations, and auctions.

The **Freedom No-Pull Harness** is used by many shelters, SPCA organizations, humane societies, and private rescues.
