

FLATWORLD CREATED AN INTERACTIVE 3D GAME APP FOR ANDROID AND IOS

The Client

The client is a leading Australian quantity surveying and cost management service provider based in Sydney.

The Requirement

The client was looking for a quick and reliable mobile app development service provider who could quickly develop an interactive 3D game app on both platforms, Android and iOS. The client wanted a game in which the main goal would be to navigate a flying owl through a series of challenges and obstacles and keeping it alive until the end.

The Challenges

Our expert team of mobile app developers and designers faced the following challenges during the mobile app development phase -

- + The client was looking for an infinitely running game which is quite different from what is existing in the market
- + The client was entering the gaming market for the first time and took some time to understand the intricacies of the mobile app development world
- + The client was looking for a partner who could understand the vision of the game and develop and launch it within a quick time

Our Solution

After carefully analyzing the various requirements of the client and understanding the vision of the game, our team of mobile app developers devised the following solution -

- + Our team of designers and writers came up with an interesting storyboard for the game app, which was further refined through multiple iterations and discussions with the client
- + We created a mockup of the game according to the storyboard to ensure that we were on the right track of developing the best app which the client has envisioned
- + Our team of designers created some of the most interesting characters which blended with the game environment very well
- + Finally, our team developed the app using the Unity 3D platform within a quick turnaround time. We also performed crowd beta testing before officially launching the app in the Google Play Store and the Apple App Store

The Result

The client was extremely happy with the interactive 3D game app developed by our team of mobile app developers. The client was not only impressed with the quality and professional looking app but also the cost-effectiveness of the entire project.

Outsource Mobile App Development Services to Us
