

Reducing Missed Checks at Strickland Youth Center

The Challenge

An Old, Expensive Welfare Check System

An older system in need of constant repair caused downtime with Strickland Youth Center's old system. The system's service subscription was expensive. The Youth Center wanted something better to help keep officers on time with welfare checks.

The Outcome

Improved Compliance, Improved Identification of Medical Emergencies, and No more Downtime

With GUARD1, Strickland Youth Center has been able to eliminate downtime and significantly lower missed welfare checks. The system is simple to use and is low maintenance.

"With GUARD1, we have significantly lowered our missed welfare checks and have improved identifying medical emergencies."

- Assistant Superintendent Spencer

What Strickland Youth Center Uses GUARD1 for:

"We use GUARD1 for Health and Welfare Checks of detention residents.

We were searching for a system that would have low maintenance and no subscription fees. We also wanted something to help keep officers on time with welfare checks.

The customer service has been great, and the tracking software and warranty sold us on moving forward with GUARD1. The product is well made, the software is user friendly, and the customer service is above anything you have ever experienced."
