

## **ARGONAUT CONSTRUCTORS - SANTA ROSA, CA**

A 60-year record of attention to detail, commitment to on-time completion, and honest hard work have made **Argonaut Constructors** the first choice among many government and private development agencies throughout northern California. Under the leadership of father and son team Michael D. Smith and Michael Jr., the Santa Rosa-based company provides grading and paving, underground pipeline, and mechanical systems services throughout the greater North Bay area. In a recent project, the company overcame numerous challenges to install 20 miles of 16" water pipe through the unforgiving volcanic rock of Lake County, completing the job under budget and ahead of schedule. We thank Argonaut for choosing SharpeSoft Estimator.
