FIREMON

Accurate Reporting & Automated Policy Management

A global telecommunications leader that provides mobile, internet, and digital services across Europe, Africa, and the Middle East, known for its innovation in 5G, cybersecurity, and digital transformation solutions.

Use Cases: Enforce Compliance, Manage Change

Industry: Telecom

🔍 The Challenge

Quickly realizing that their current NSPM solution was providing inaccurate reporting as well as never successfully implementing the automation capabilities they requested, the company was unwilling to settle for a solution that could not deliver on their promises.

The company sought to:

100%

GDPR and PCI DSS compliance

200+

Devices currently managed

Minutes

Not days to create on-demand custom reports

- Upgrade from their existing NSPM solution for improved change automation capabilities

- Increase compliance report accuracy, decreasing the amount of manual time and effort necessary to validate reports

- Automate change management processes, clean-up rule bases, and improve reporting

- Gain a single, comprehensive view of policy across their multi-vendor environment including Cisco, CheckPoint, Juniper, Fortinet and Palo Alto

- Eliminate error-prone and time-consuming manual processes

The Solution

With FireMon's network security policy management solutions, the company gained highly customizable, accurate reports along with change automation that delivered improved process efficiency all while maintain 100% compliance with internal and regulatory standards.

- Highly customizable compliance assessments and automated reporting

- Policy standardization and optimization, identified and cleaned redundant, overly-permissive, and shadowed rules

- Pre-configured and ad hoc compliance/audit reports and on-demand, scheduled, and real-time (on change) compliance reports

- Proactive compliance checks and auto-denial of changes that violate compliance standards

Results

- 100% GDPR and PCI DSS compliance

- Reduced risk of human error by eliminating manual process for rule set and compliance reporting

- Increased security posture through real-time, continuous monitoring of all devices in a single location

- 100% visibility into 200+ multi-vendor environment from a single pane of glass view

About FireMon

FireMon's mission is to improve security operations that will in turn lead to better security outcomes. FireMon delivers industry-leading security policy management, cloud security operations, and asset management solutions. Our platform is the only real-time solution that reduces firewall and cloud security policy-related risks, manages policy changes, and enforces compliance. FireMon's Cloud Defense (formerly DisruptOps) is the only distributed cloud security operations offering that detects and responds to issues in the fast-paced public cloud environments. Our cloud-based Asset Management solution (formerly Lumeta) scans entire infrastructures to identify everything in the environment and provide valuable insights into how it's all connected.
