

Inventory Management

OPERATIONAL TEAMS

Because solid inventory management is crucial to keeping your organisation lean and efficient, you need clarity. You need the right tools to achieve this.

Thanks to Forest Admin you will be able to monitor and update your inventory database. In case certain products need to be ordered, you can do so straight from your Admin Panel. You can efficiently set-up workflows for your operational teams, allowing you to structure and streamline your inventory process. In case you are working with third-party services you can reconcile your inventory data with your order and customer data.

ace & tate

We use the Forest Admin panel in all of our physical stores to make sure we keep the right stock of all of our different types of glasses.

Gideon de Kok, Technical Director at Ace & Tate
