FIREMON

Automated Policy Management & Continuous Compliance

Facing a rapidly-approaching compliance deadline, a multinational oil and gas company turned to FireMon for help automating their policy workflows to achieve compliance while saving time and resources.

Use Cases: Change Automation, Continuous Compliance

Industry: Oil & Gas

The Challenge

Due to pressure resulting from a recent pipeline cyberattack, urgent policy cleanup was necessary to meet new internal compliance practices within 90 days. The company lacked the visibility and automation across their complex, multi-vendor environment necessary to meet the 90-day deadline.

The company sought to:

- Meet new internal compliance standards within 90 days

- Eliminate manual firewall rule audit policy and rule changes

- Gain consistent policy management across a hybrid cloud environment

80%

Reduction in the time to produce accurate compliance reports

60%

Less time needed to remediate risky rules

⚙ The Solution

With NSPM from FireMon, the company gained realtime visibility, control, and management capabilities for all network security devices across its hybrid cloud environment

- A single management console for unified policy visibility and management of the company's entire 800+ device, multi-vendor hybrid environment
- 100% visibility through real-time discovery that includes IP addresses, devices, and endpoints
- Standardization, optimization, and automated deployment of policy rule changes

📊 Results

- ⊘ 80% reduction in the time to produce accurate compliance reports through policy standardization and automation of manual processes
- ⊘ 60% less time needed to remediate risky rules
- ⊘ 800+ devices currently managed
- ⊘ 20+ previously unknown devices discovered during deployment, decreasing risk
- ⊘ Increased security posture through real-time, continuous monitoring of all devices in a single location

800+

Devices currently managed

About FireMon

FireMon's mission is to improve security operations that will in turn lead to better security outcomes. FireMon delivers industry-leading security policy management, cloud security operations, and asset management solutions. Our platform is the only real-time solution that reduces firewall and cloud security policy-related risks, manages policy changes, and enforces compliance. FireMon's Cloud Defense (formerly DisruptOps) is the only distributed cloud security operations offering that detects and responds to issues in the fast-paced public cloud environments. Our cloud-based Asset Management solution (formerly Lumeta) scans entire infrastructures to identify everything in the environment and provide valuable insights into how it's all connected.
