Acoustical Solutions

Acoustical Solutions is a leading provider of acoustical products and soundproofing used in architectural and industrial applications.

Their broad product line includes **sound absorbing acoustic panels**, fabrics, and foam, alongside installation services, **acoustical engineering services**, and consulting.

Acoustical Solutions was founded by Michael Binns in 1989. Michael started out in local recording studios, learning about architectural acoustics while completing a degree at Virginia Commonwealth University.

His know-how, integrity, and drive led him to start his own business. Today, more than 30 years later, Acoustical Solutions is an industry leader in product selection, quality, and experience.

“There isn’t a type of facility or noise issue that we haven’t worked to solve.”

For projects ranging from sound studios to classrooms, **worship facilities** to manufacturing plants, Acoustical Solutions take pride in providing solutions that simply work.

“We focus on solving all types of acoustical problems,” explains president Joe Niemann. “From large scale construction projects to **open office soundproofing** problems, to industrial projects requiring custom-engineered enclosures – there isn’t a type of facility or noise issue that we haven’t worked to solve.”

Having built its stellar reputation through excellent service, the company also takes a proactive approach to a more sustainable tomorrow by continuously searching for **cleaner, greener acoustic materials**.

WooExpert Shadi Manna of **Progressus.io** made numerous customizations to the website, from freight shipping options to tailored product layouts.
