

Eskudad Customer Stories

Industry: Forestry

araucó

BEFORE ESKUAD

- Field Managers dealt with 30+ types of daily tasks and had to coordinate with several field teams to accomplish them.
- Tracking progress and managing tasks within teams and amongst workers was extremely difficult, often times leading to rework
- Little to no internet connection in remote areas lead to a reliance on paper forms and analog tools
- Each operator spent 2 hours per day transcribing data to digital forms and creating reports.

After Eskudad

- Implementing Eskudad's multiplatform solution made it possible to automate tasks and workflows
- Realtime task management and updates, **eliminating any rework**
- Eskudad's offline operation allowed them to use devices to input the data collected in the field directly, eliminating transcription. This lead to a **20% time savings**.
- Reports and data were automatically generated and sent, allowing stakeholders to receive data **20x faster**.
