

Customer case studies

Armor Pest Control

Using Briostack's routing tools, Armor made significant improvements in how they dispatch and route their service trucks. This led to big savings in fuel costs, labor costs, and allowed them to reduce their service truck needs by 15 trucks.

How Briostack Helped:

- > Reduced starting truck fleet size from 30 to 15
- > Cutting fuel cost
- > Saving time for techs
- > Reducing office staff
- > Streamlining processes

"We've worked with several other software companies in pest control, and Briostack really knows what they're doing and they really understand our industry."

MORGAN SPILLET, ARMOR PEST DEFENSE
