

AT A GLANCE

Challenges

- Lengthy and complex training process
- Inconsistent report templates
- Creation of training content too long and complicated
- Lack of learner engagement.

Benefits

- A better process and interface for learners
- Agile Management Reporting
- Quick and Easy Content creation including Magic Questions (AI)
- Fun, interactive user interface encouraging training anywhere, anytime, on any device.

“

Since using Enabley, many more users are engaged and participating in the training sessions. It's much easier to create and track training so we can improve quicker

Training Specialist

Challenges

Axtel's main training challenge was to create an area to develop and distribute technical content, regulatory compliance, and soft skills, to the company's various teams. To achieve this they searched for a digital solution that offered ease of use, an exceptional user experience, a robust security system and offered adequate reports for monitoring processes.

Solutions

After exploring several options and rigorous testing, Enabley was chosen as the best solution. Its platform offers seamless integration, an intuitive interface and all the features needed to provide a comprehensive and effective training experience for our employees. We are confident that Enabley will be a key tool in our effort to continually improve our training program.

Outcome

- An average of **12.6 hours of training per employee**
- General satisfaction **index of 4.71 out of 5** in the institutional training program
- Training participation **rate of 99.1%** – an **increase of 20% participation rate** compared to previous platform.
