

Web design customer: Azzurro Italian Restaurant

Project Brief: We were contacted by the owners of Azzurro restaurant, they had a website which they couldn't update themselves and each time they wanted to update it their web designer wanted to charge them a lot of money. They needed to be able to update and edit the website themselves. It also needed to be made mobile and tablet friendly.

Customers Video Review / Testimonial Transcript: "Hello my name is Astella, I'm from Azzurro restaurant in Westcliff. I'd like to thank Joseph for his good design of our new website. It's easy to use... Fantastic... You can get around it easily... (Looks to her husband for support, and he reminds her that they can update the website themselves now.) We can update it ourselves... (Laughs)"
