USER EXPERIENCE, INTERFACE, AND
WEBSITE DESIGN AND DEVELOP

Capturing the True Value Technology Provides

MESH designed and developed BEI Networks' website to more accurately differentiate the company in a highly competitive market.

WHEN EVERYONE IS INNOVATIVE, YOU NEED SOMETHING SPECIAL

BEI Networks delivers some of the most brilliant high-density network planning and implementation in the market, supporting world-class stadiums. As a business, they've always wrestled with standing out in a market filled with less able competitors.

MESH helped BEI Networks reposition itself while showcasing the company's ability to help key accounts meet the needs of their customers through a complete redesign and development of a new website. Components of the site include:

- ✓ Smart "BE IN..." messaging
- ✓ Jump start content marketing efforts
- ✓ Flip messaging from inside out to outside in
