

CUSTOMER USE CASE

BH Planning | Wise Co. TX

USES DRAGONFORCE FOR THE FOLLOWING:

- Daily Personnel Task Assignments
- Pipeline Maintenance & Mowing
- Client Reports of Tasks Completed
- Safety & Security for Lone Workers
- Personnel Accountability
- Project Status & Access Control
- Critical Infrastructure Identification

OPERATE INSIDE & OUTSIDE YOUR ORGANIZATION

Share messages, photos, reports and location information with anyone in your organization by forming a DragonForce “Mixed Group.” Easily operate and share critical site information with First Responders for any incident or response needed. Create pre-plans with local agencies to shorten response times and increase safety.

LEVERAGE YOUR INVESTMENTS

Asset & Vehicle Tracking – Overlay the location of your tracked assets (vehicles, radios, tracking tags, sensors) onto DragonForce operational maps

GIS – DragonForce can display the base maps and feature layers from your GIS system or overlay including offline KML files

UAV – Capture and Live Stream video of critical infrastructure inspections or planning from UAVs or personnel in the field through the DragonForce web or mobile app

Dispatch / Outage – Create DragonForce groups based on Task and Dispatch responses to customer issues or outages
