BeLeaf offers sustainable solutions to everyday plastic waste in the Maltese islands.

This Malta-based company was born from the pledge to “begin making small changes in our lives that would lead to the reduction of plastic waste we generate every day.” Believing in a greener future for the island of Malta, BeLeaf source conscious consumables such as [silicone storage bags](#) and [collapsible coffee mugs](#) from around the world. They hope that these products will enable customers to live a plastic-free life, reducing the negative impact on the environment.

BeLeaf also spread awareness about sustainable living through their blog, with [zero-waste product swaps](#) and tips on how to work and travel in a more environmentally conscious way.

*“WordPress and WooCommerce since it offered exactly what we were after in terms of functionality.”*

BeLeaf’s site was created by Maltese developers, [NIU](#). “We have developed the site around WordPress and WooCommerce since it offered exactly what we were after in terms of functionality,” says Matthew Sammut.
