

Beachcomber Tours create tailor-made holidays in exclusive resorts. The operator uses Tigerbay to manage their complex accommodation contracts. Amadeus integration enables tailor-made bookings for both B2C and B2B customers. All customer documentation including quotes and booking confirmations are generated using Tigerbay's DMS. Reporting and accounting functions also take place in Tigerbay's platform.

“We went live six months after starting the project, as planned. Tigerbay guided us through a smooth implementation. The team are very knowledgeable and through constant communication they helped us prioritise appropriately to ensure the initial installation project went well.

Haydn Marshall, IT Manager
Sector: Tailor-made
