

BRAVUZ
HIREMATCH

World's First Blockchain Recruitment Platform

What was done by DIGIS:

Build the System from scratch

to meet the Client's needs and expectations and follow the latest technology trends

Implemented Blockchain Functionality

to make the System 100% secure and transparent while retaining all the powers

Added SmartContracts Feature

to remove human factor and mitigate possible risks through delegating most routine and boring operations to smart algorithms

The screenshot displays the Bravuz Hirematch web application interface. The left sidebar contains navigation links: Dashboard, JOBS, Applicants, Interviews, and Edit Company. The main content area is divided into two sections. The top section, 'View Jobs', shows a list of job postings for Intel, including roles like HR / Admin Executive, Ecommerce Web Developer, and Customer Service Executives. The bottom section, 'Profile', displays the profile of Mark Samuel Andreas, a PHP Developer, with contact information and a history of interviews.

Title*	Type	Views	Status	Action
HR / Admin Executive	0	22	active	View Edit
Ecommerce Web Developer	0	22	active	View Edit
Customer Service Executives	0	22	active	View Edit
Front end developer	0	22	active	View Edit
HR / Admin Executive	0	22	active	View Edit

Added Machine Learning Functionality

to make the System capable of predicting the user's actions and taking those from users in the future

Build Dashboard Module

to collect all important data in a single location and visualize all statistics and other essential information

Integrated Report Export Module

to let the system autogenerate and export all critical reports to external formats for further use
