

COX AND COX CONSTRUCTION - REDDING, CA

Rock trenching machines are like giant chain saws on tracks that can cut through solid rock like a knife through butter. In Northern California, **Cox and Cox Construction** is one of the few heavy construction companies that knows how to use them, making them the go to company when the project requires digging through solid rock in difficult terrain.

COX & COX Construction, Inc.

"A General Engineering Company Specializing in Underground Construction"
P.O. Box 992588, Redding, CA 96099 - (530) 243-6016

Underground Utilities ♦ General Engineering ♦ Earthworks

Mission/Vision
"To operate our business with integrity, strong work ethic and honesty, creating long-lasting relationships with our clients that support our unmatched, excellent reputation."

However, rock trenching is just part of an overall package of utility, infrastructure and site development services the company has provided to Northern California and Nevada developers for nearly four decades.

Founded in 1980 by Vernon and Richard Cox and now helmed by son Vernon Cox Jr., the Redding, CA company's continuing success is built on a solid reputation of integrity, work ethic, and professionalism, and for nurturing long term client relationships.

Thanks Cox and Cox for letting SharpeSoft be a part of that success.
