Car2Go is a car rental company in Køge, Denmark.

All **vehicles available for booking** are brand-new Nissan models offering a level of comfort, sophistication, and optimum driving pleasure. Both private individuals and business customers are able to choose from vehicles such as passenger cars, vans, or smaller trucks to suit their purposes.

Should customers wish to hire a car or van for longer periods of time, Car2Go also offer monthly or **short-term leasing** of their vehicles. Optional extras (such as extra kilometers, GPS, or child seats) can easily be added to tailor each booking to customers' needs.

"For a year, Car2Go had been working on a new rental platform that had not yet been successful [when] they came to us. It was not enough that the solution only made it possible to book cars online, but [that] it would also make the administration more efficient in connection with the various bookings, making the whole process easier."
– Layback ApS

A car rental company focused on customers, Car2Go is the rental arm of PMAcars, Denmark's largest and oldest Nissan retailer.
