LINQ + Carson City School District

The Purpose-Built Solution

that Makes Life Easier for Nutrition Teams
in the Carson City School District

Carson City School District needed a nutrition system built for K-12, not outdated software that created inefficiencies for staff and families. By switching to LINQ Nutrition, the district eliminated inefficiencies, gained real-time data access, and simplified meal payments for families. Now, staff can update reports remotely, parents can manage all school payments in one place, and the entire nutrition operation runs more efficiently.

When Elizabeth Martinez took over as Director of Nutrition, she knew the district needed a purpose-built K-12 solution to boost efficiency, simplify school meal payments for families, and ensure worry-free compliance.

Martinez emphasizes that a system designed specifically for schools made all the difference. With custom reporting, cloud-based access, and full integration with school operations, the LINQ School Nutrition Suite helps them feed students more efficiently while making life easier for her team and families.

How They Did It:

- **Cloud-based system** replaced outdated, manual processes

- **Real-time reporting** eliminated inaccuracies and streamlined decision-making Menus Built in Minutes

- **Integrated digital payment platform** made it easier for families to manage meal accounts

- **Stronger K-12 support** ensured staff had the help they needed when they needed it

> " LINQ Nutrition has made my life so much easier. It just works the way a school system needs it to."
