

CASE STUDY

Global Pharma Restores Compliance and Visibility After Skybox Shutdown

A leading global biopharmaceutical company dedicated to developing innovative medicines that help patients prevail over serious diseases.

Use Cases: Enforce Compliance

Industry: Pharmaceutical

The Challenge

A leading global pharmaceutical company managing over 100 firewalls, including Check Point and Cisco, faced a critical compliance and visibility gap following the sudden Skybox shutdown. As a highly regulated enterprise operating across multiple jurisdictions, the organization needed to rapidly restore compliance reporting, rule monitoring, and visibility to maintain regulatory confidence and operational control.

The company sought to:

65% Reduction

**in compliance audit
preparation time**

100+

**Centralized management
with real-time insights and
reporting.**

- Regain automated compliance visibility across ISO 27001 and CIS Benchmarks.
- Replace Skybox functionality with minimal disruption or reliance on professional services.
- Centralize visibility, rule management, and reporting across all firewalls.
- Enable scalable, API-driven architecture to support future automation.

90 Days

Full restoration of audit-ready compliance visibility across all firewalls.

The Solution

The organization selected FireMon to restore compliance and extend beyond legacy Skybox Security capabilities. FireMon's real-time policy management platform provided immediate visibility, automated compliance checks, and continuous monitoring across all firewalls. Out-of-the-box insights and metadata eliminated long setup times, enabling rapid deployment and measurable results.

- Automated compliance validation for ISO 27001 and CIS frameworks.
- Centralized, real-time visibility into all Check Point and Cisco firewalls.
- Continuous monitoring of rule changes, risk indicators, and violations.
- Rule usage analytics, cleanup recommendations, and before/after change tracking.
- Seamless integration into the organization's managed service provider (MSP) framework.

Results

- FireMon successfully simulated Skybox migration in a partner lab, validating functionality and accelerating adoption.
- Met all requirements out-of-the-box—no custom development or future releases needed.
- API-first design and visualization built for large, complex networks.
- Eliminated heavy professional services and reduced operational overhead.
- Deep collaboration with the MSP ensured seamless transition and stakeholder confidence.

About FireMon

FireMon's mission is to improve security operations that will in turn lead to better security outcomes. FireMon delivers industry-leading security policy management, cloud security operations, and asset management solutions. Our platform is the only real-time solution that reduces firewall and cloud security policy-related risks, manages policy changes, and enforces compliance. FireMon's Cloud Defense (formerly DisruptOps) is the only distributed cloud security operations offering that detects and responds to issues in the fast-paced public cloud environments. Our cloud-based Asset Management solution (formerly Lumeta) scans entire infrastructures to identify everything in the environment and provide valuable insights into how it's all connected.
