Problem

Castorama wanted to strengthen the security of its bank exchange processes by implementing the signature attached to the EBICS TS protocol. This approach was not to affect the tools already in place, including accounting and cash flow.

Solution

After an in-depth analysis and tests over several months, NEOFI Solutions' offer was selected. No software of the information system has been modified, the NEOFI Payment solutions recover the files leaving the ERP to integrate them into its platform after conversion and enrichment for validation and signature.
