

Cemento Interocéanico website

Cemento Interocéánico is an all Panamanian company that has a mission of developing a sustainable future for Panama's financial growth. They work hand in hand with the needs of the market and provide top-notch cement.

We developed a new and innovative [website](http://www.cementointeroceanico.com/) for them that represents their company and their values. Using Drupal 7 we structured a website that is visually enjoyable and easy to navigate, customers can make online requests for products and get an insight into the production process of the cement through HTML animations.

Client

Cemento Interocéanico

Project information

Case highlight

- Drupal 7 web development
- Responsive web design
- Animations in HTML5
