

## Cendres+Métaux Unifies Security Operations With BNC & Check Point

**Solution:** Security For Remote Users (Harmony)

**Industry:** Manufacturing

**Location:** EMEA

The Biel-based company has been in existence for over 135 years and operates as a contract manufacturer in two industries. Cendres+Métaux Luxury+Industry specialises in the micromechanical production of semi-finished and finished products from high-quality materials and the recycling of precious metals. In addition to the watchmaking industry, Cendres+Métaux is also a contract manufacturer for medical technology through its Medtech division. Cendres+Métaux also sells products for the dental industry under its own brand. The group of companies has a total of around 700 employees. The shares of Cendres+Métaux Holding are traded on BEKB's OTC-X electronic trading platform for unlisted Swiss shares.

“Before the project [with BNC and Check Point], with products from different managers and this has led to a fragmented view of potential care options and limited capability to respond to security incidents the biggest challenge for us was to create a central overview across all of our endpoints, especially for employees who are frequently on the road. We retained BNC's pragmatic and goal-oriented approach, which we highly-value together with Check Point.”

-Lukas Wenner, head of IT at Cendres+Métaux

### Challenge

- Centralize security oversight and management
- Build a more manageable, agile technology stack
- Attain cost effective security without sacrificing effectiveness

### Solution

- Check Point Harmony Endpoint

### Outcome

- Centralized security management
- Substantially increased efficiency
- Increased security throughout Cendres+Métaux's environment
