In sales revenue, and it continues to increase daily.

✓ Webinar Success Tip

Give your users as much information about webinar times as possible without having to click into a popup. We found that our cost per lead went down considerably by using a Stealth registration page template that shows 3 upcoming times, one of which is a Just In Time schedule. That allows people to see at a glance whether upcoming times are going to work for their schedule.

"We moved to StealthSeminar because our former webinar platform had many issues with deliverability, particularly on mobile. Since moving to Stealth, we've seen over a 50% increase in the number of webinar registrants who view our offer, and this is translating directly to our bottom line.... I'm very glad that we made the change. "
