

# SYNCFUSION MAKES REPORTING REWARDING

"The Syncfusion Report Platform is an excellent, unbeatable reporting solution."

**Costas Kounadis**  
CompkSoft

## BENEFITS

Easy to build reports.

Extensive data collection & capture capabilities.

Simplified report sharing.

## CHALLENGE & SOLUTIONS

Analyzing business data is no small feat, and one of the major hurdles in doing so is the variety of data sources and data types that must be harvested before any analysis can begin. Handling this problem is what prompted Costas Kounadis, a software developer at CompkSoft, to find a new reporting solution.

Kounadis was tasked with building an environment for data analysis for businesses and their customers, and his reporting solution at the time was precipitating more headaches than happiness. After a short trial period, Kounadis made the switch to the Syncfusion Dashboard and Report Platforms.

For Kounadis, data collection is where Syncfusion excels. The Report Platform allowed him to pull from all kinds of data sources, including SQL Server and Excel files. With his data corralled and tamed, he was then able to easily build concise, professional reports through the Report Designer application in the Report Platform.

With little extra effort, Kounadis also utilized the Syncfusion Dashboard Platform to deliver dynamic, interactive dashboards to his clients. In turn, his clients were able to manage and share their reports and dashboards through a simple web interface built into the Platforms.
