REAL WOOCOMMERCE STORES SUBMITTED BY THEIR MAKERS

Custom Seafood Processors

Custom Seafood Processors, Inc. (dba Custom Seafoods) began in 1994 as a small family owned business to process, package, and freeze sport-caught fish primarily for visiting tourists. The company incorporated and moved to a new leased location in 1996. The following ten years brought continued growth with greater exposure and improved customer success. We also expanded our services to include smoking and wild game processing.

Bright Vessel built from the ground up the new digital platform in WordPress and WooCommerce. We set up custom shipping options, gift cards, and variable products. The client has the ability to use a builder to easily manage pages, built in Analytics, and custom email messages for customers.
