

**D360**

Why the switch to Creately?

To ensure full compliance, Creately delivered a robust on-premise deployment tailored to the bank's infrastructure and security protocols. The bank also needed to migrate over 3,500 existing diagrams from a previous platform. Creately successfully executed a seamless migration, converting all content into fully editable formats while preserving structure and data integrity.

What this means for users:

- A secure, on-premise solution aligned with Saudi Arabian data residency mandates.
- Full migration of 3,500 diagrams into an editable Creately environment.
- A trusted, scalable platform supporting high-stakes financial workflows without disruption.

D360 Bank Adopts Creately for Secure, On-Premise Visual Collaboration

D360, a leading bank in Saudi Arabia, transitioned to Creately to meet its strict data residency and security requirements which are critical for operating within the region's financial and regulatory frameworks.
