

## Environmental policy

### Call for evidence on climate change: collecting key policy input

The UK's Department for Environment, Food and Rural Affairs (Defra) conducted a call for evidence on climate change as part of a 'Review of the Balance of Competences between the UK and the European Union'. They used Citizen Space to hear from experts, non-governmental organisations, business people, elected representatives and others about handling this crucial policy area in the EU.

Other environmental policy initiatives using our tools include:

- Sustainable fisheries for future generations, UK
- Regulation of felling and restocking consultation, Scottish Government
- Energy and Climate Change Public Attitudes Tracker Review, UK Dept for Business, Energy & Industrial Strategy
- The Future of Forestry in Scotland
- Minerals and waste local plan review, Norfolk, UK
- Electric Vehicle Charging Point Consultation, Richmond-upon-Thames, UK

---

“We wanted to move Defra’s consultations on to a digital platform to provide better accessibility and quality of service to stakeholders and the public – and to provide a uniform style of consultation.”

- *Better Regulation Team, Defra*
