Dublin City Council: local area plans

Dublin City Council use [Citizen Space](#) as their digital hub for public consultation – including all their Local Area Plans. With dozens of consultations every year, they make extensive use of the online survey and analysis tools, making it easier both for them to manage their activity and for people to get involved and give their views.

"The implementation of the LAP will help safeguard the significant investment made in the area to date and ensure that the regeneration is brought to a successful conclusion. This period of consultation for the Local Area plan is an opportunity for all stakeholders in the area to have a say on the future of Ballymun."

Councillor for Ballymun, Dublin City Council
