

# EDUCATION

## ETS - Educational Testing Service

ETS develops, administers and scores more than 50 million tests annually in more than 180 countries, at more than 9,000 locations worldwide.

### Business Need

As the world's largest private educational testing and measurement organization, ETS (Educational Testing Services) required a more effective way to view and manage their contracts globally. ETS selected opensourceCM Contract Manager to gain visibility and immediate access to thousands of contracts. In addition, the application enables the management of contract terms and obligations such as dates, events and milestones.

*"We were impressed by opensourceCM's service and product flexibility. The company was attentive to our needs, configured a fully functional evaluation version of the system for us, and supported our testing group through a lengthy evaluation process. Their attitude, in addition to the robustness and flexibility of the system, convinced us that this was the best overall offering for us."*
