

**Improved retention by  
30% over the first 6  
months of employment.**

## **Enterprise Security Company**

### **About**

An international organization with more than 18,000 employees and more than 6,900 employees in the IT and Engineering roles.

### **The Problem**

They are in need of IT and engineering roles skills mapping. They tried to do it manually with little success and they are looking to find the top talent for each group of positions

## **Our Solution**

- A platform that allows recruiters to quickly identify the top candidates, engage them and intelligently match them to the open positions that best fit their skills.
- Increasing their ideal candidate pool, decreasing hiring time and increasing employee retention over the first 6 months of employment.
