

CASE STUDY

Compliance, Visibility, and Zero Trust

A leading independent U.S. federal agency responsible for enforcing security laws and protecting investors.

Use Cases: Enforce Compliance

Industry: Government

The Challenge

A major U.S. federal agency responsible for maintaining market integrity and investor protection had spent over a decade relying on an underperforming network security policy management tool. With growing compliance requirements and a push toward a zero-trust architecture, the agency needed a more reliable and adaptable solution.

The company sought to:

- Fully automate firewall policy changes
- Select a solution with centralized, real-time control across their multi-vendor environment including [Cisco](#), [Palo Alto](#), [AWS](#), and [Azure](#)
- Support their [Zero Trust](#) initiative and network threat modeling
- Accelerate compliance tracking and audit readiness

The Solution

100%

Real-time visibility into all network assets across cloud and on-prem

500+

Devices managed across Cisco, Palo Alto, AWS, and Azure environments

FireMon's [network security policy management solutions](#) ensured this government agency gained end-to-end visibility, real-time compliance assurance, and automation across their complexity hybrid network environment. FireMon replaced legacy tools with a centralized platform that integrated policy planning, risk analysis, and asset management to support the agency's Zero Trust and compliance initiatives.

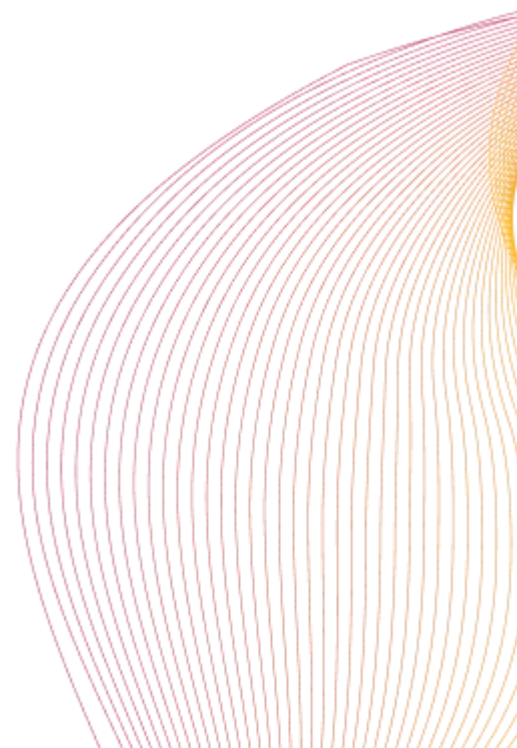

- Support for Zero Trust architecture and a federal network threat modeling initiative
- Real-time compliance assessments and reporting across 500+ multi-vendor environments
- Automated change workflows and audit documentation for compliance tracking
- 100% real-time visibility into all security policies and network assets
- Consolidated single source of truth across hybrid and multi-vendor environments
- Proactive identification of risk and auto-denial of non-compliant changes

Results

- Real-time visibility into 500+ security devices across cloud and on-prem environments
- Centralized platform enables proactive enforcement of Zero Trust policies and threat modeling
- Automated policy management and change workflows reduced manual effort and ensure compliance
- [Compliance reporting](#) and rule analysis that once took days now completed in minutes
- Full asset inventory and visibility reduce risk of blind spots and audit failures

 **60%**

**Reduction in manual effort
for compliance and change
management**

About FireMon

FireMon's mission is to improve security operations that will in turn lead to better security outcomes. FireMon delivers industry-leading security policy management, cloud security operations, and asset management solutions. Our platform is the only real-time solution that reduces firewall and cloud security policy-related risks, manages policy changes, and enforces compliance. FireMon's Cloud Defense (formerly DisruptOps) is the only distributed cloud security operations offering that detects and responds to issues in the fast-paced public cloud environments. Our cloud-based Asset Management solution (formerly Lumeta) scans entire infrastructures to identify everything in the environment and provide valuable insights into how it's all connected.
