Fitlife Foods tasked Absolute Web Services with creating an online presence that was cool, fresh looking, and easy to use. Many advanced features were required for this project, including a delivery system that would handle online orders, complete menu board, select nearest delivery point, and auto-load the selected food delivery plan selected to guarantee an 100% customer satisfaction and experience. In addition, AWS integrated a custom web design with WordPress+WooCommerce to give Fitlife Foods complete content control. Users have experienced an incredible experience and fit for life has seen tremendous online sales/subscription growth!
