

Flow SEO

Flow SEO offers bespoke SEO services to software and eLearning clients with a sharp, professionally designed website built with Thrive Theme Builder, Thrive Architect, and Thrive Leads. This has given them the power to *completely customize* their service-based website to match the Flow SEO brand experience – everything from consistent colors and typography, through to helpful footer designs and a gorgeous blog. Everything about Flow SEO's website is designed to engage visitors and guide them towards getting in touch to discuss their project needs.

We love these features...

Show off a talented team with professional Blocks templates

Flow SEO is a team effort, and the professionally designed Team Blocks are perfect for showing clients the range and depth of talent that Flow SEO can bring to their SEO campaigns. And of course, they're customized to fit Flow SEO's brand perfectly.

Thrive Architect

Make it super-easy for potential clients to start a conversation

Viola knows that growing a list of lead emails is an important part of running a successful service business. She uses full-screen opt-in forms that automatically trigger when visitors scroll down the page. These double as initial contact forms to start a meaningful conversation with potential clients.

Thrive Leads

Gorgeous, minimalist page designs with consistent branding

We LOVE Flow SEO's use of whitespace, colors and typography to create a consistent brand and visitor experience. This is thanks to Flow SEO's design skills, combined with Thrive Theme Builder's SMART colors and typography.

Thrive Theme Builder

Viola Eva  
at Flow SEO

I am a digital marketer and SEO, this means that I work with websites day in and day out. However, I am neither a web designer nor web developer - but I want a good-looking site that is easy to update.

I look at so many WordPress websites for my clients and a lot of them have a clunky backend, or they need design and development resources to make updates. This is why I love using Thrive Suite on my website - everything is in my control.

The builders are easy to use and, if I ever have a question, the Thrive team has surely covered it with a video.

And best of all - my complete lack of design skills is compensated by the templated building Blocks. WordPress is often a mess of plugins that don't talk to each other or cause problems when updating, not so with Thrive Themes where everything runs smoothly. I can not recommend them enough!
