**Green Dinner Table** create plant-based foods in an exciting and creative way, whilst still having the full benefit of being a healthy and sustainable way to eat.

A weekly meal **subscription** service, each box is delivered to your door every Sunday afternoon full of the freshest local produce, delicious gourmet sauces and unique contemporary recipes – all created by resident chef, Tom Riley. By proudly supporting local growers and food producers, Green Dinner Table strive to use in-season produce when designing their delicious menus.

Choose your week's meals from **two available plans** – couples or family, each full of flavor and variety, with the option of either three or five meals. You can even get a sneak peek of upcoming meals to whet your appetite further.

*"This was a unique eCommerce project that needed a robust subscription method that could be tailored to align customers' payments to the same day of the week (irrespective of which day they signed up) as Sunday afternoons are the cut-off for the next week's delivery. We love the WooCommerce Subscriptions extension."*

*– Norman McKenzie, Meta Digital*

Adding to the convenience and taking the hassle out of healthy eating, most meals can be cooked in 30 minutes or less, with pre-portioned meal ingredients meaning less waste. Follow the straightforward recipes and you'll be creating restaurant quality plant-based meals at home in no time.
