

HARRIS COMPANY CONCRETE CONSTRUCTION - PENNGROVE, CA

"A smooth finish for the wine country," has been the motto of Pengrove CA contracting firm, **Harris Company Concrete Construction** since they first began offering top-notch concrete services in Sonoma County in the summer of 2010.

The company was right in the middle of the deadly wild fires that swept through the area last year that killed dozens of people and left thousands homeless. In the aftermath, Harris was among the many construction firms that stepped up to help with rebuilding efforts throughout the devastated area.

The company specializes in concrete work of all kinds, including metal building and residential foundations, site work, and architectural concrete. They are known for being reliable, trustworthy, and easy to work with. They can take on any concrete project and complete it with the highest quality, on time and within budget.

Harris has the experience, skills, knowledge, and tools to get the job done, and SharpeSoft is proud to include them in our family of clients.
