

Havas Voyages secures its banking communication

Recognized specialist in the distribution of leisure and business travel for individuals and businesses, Havas Voyages has 335 travel agencies spread over the French territory and a merchant site www.havas-voyages.fr. A Marietton Group company since January 2016, Havas Voyages is today the third largest travel agency network in France.

HAVAS VOYAGES

Problem

In the middle of a digital and IT transformation phase, Havas Voyages needed a simple and user-friendly tool allowing the reconstruction of its information system as well as a complete autonomy and the ability to contain costs. The solution sought was to integrate smoothly into the existing IT environment, while linking the different applications of the Treasury Department.

Results

The perfect project control during the payment platform deployment, along with the reactivity of NEOFI team to correct any problem (internal, banking, regulatory, etc...) helped increase the confidence of HAVAS VOYAGES in NEOFI. HAVAS VOYAGES is ready to integrate its subsidiaries and totally serene to connect the next acquisitions of the group.

Solution

Pricing of NEOFI's solutions is independent of the number of applications, banks, signatories and perimeter evolution. The solution revealed all its versatility when it had to be provisionally installed in the Cloud during Marietton take-over, pending its integration into the IT scope of the group.
