# Scheduling App Saves Non-Profit Infinite Time on Scheduling

Homeless Garden Project is an established non-profit organization providing job training, transitional employment, and support services to individuals in Santa Cruz who are experiencing homelessness.

*"The app is definitely worth it. Especially if you have a large number of employees that need to figure out their own schedules."*  
– Justin Wright, Volunteer Coordinator

Prior to When I Work the Homeless Garden Project had too many volunteers to schedule manually. They needed a system that would allow staff and volunteers to fill in their own schedules. Justin saves 10 hours a week with the app and has peace of mind the shifts are covered.
