

## Case studies from our customers

FLEISCHHAUER

### Car Dealer Jacob Fleischhauer GmbH

#### Challenge:

Before launching a photography app, we didn't have consistent images across our 14 locations and the photography processes were laborious. The images were taken inconsistently and manually uploaded to our inventory management. It became increasingly clear that we needed a service provider in the area of photography processes and image editing.

#### Successful implementation with autofox:

After a thorough examination of various providers, Autohaus Jacob Fleischhauer GmbH decided on autofox. The advanced AI photography and high-quality image optimization, especially during the impressive on-site presentation, convinced us. The introduction of a 3D showroom significantly improved vehicle presentation and made a noticeable contribution to increasing sales. After a successful three-month pilot phase, it became clear that autofox.ai was the ideal long-term partner for us.

- ✓ Fast photography process and consistent images
- ✓ Direct integration into inventory management
- ✓ Shorter downtimes
- ✓ Integrated logo
