

## LEADING LAW FIRM

Compulink has always been extremely responsive to our needs and inquiries. In fact, we are most impressed with Compulink's ability to proactively advise us of issues that may arise, even before a negative result occurs. We happily recommend Compulink Technologies as a partner and leader in technology sales and consulting. – Andrew C., Leading Law Firm

### Compulink's Solution:

- One major project has been the relocation of their whole database to a collocation data center.
- We provided the procurement, installation, and configuration for the new location.
- Our senior staff engineer was involved in this project for a five month period, where he assessed the issue, consulted the client, constructed an inventory, configured the equipment and implemented the entire project.
- Now our senior staff engineer is also providing remote support on top new configurations for their expansion.
- Compulink set up 4 blade servers, an EMC SAN, a Cisco ASA Firewall with load balancing, on top of setting up a terminal service between co-location and customer site.
- Compulink continues to maintain and to manage leading law firm.
