

Customer Success Case Study – L W Cole

L W Cole specialises in supplying and installing appliances to the UK house building community across England and Wales.

The company has recently grown so rapidly, it was clear its financial management processes needed an overhaul to keep up. It chose Sage Intacct for its finance and business management system.

The business needed a cloud-based system that could communicate with its existing infrastructure and fit within budget.

Before Sage Intacct, the financial outlook had to wait until the end of the month. Now, financial insights and projections can be generated at any given moment.

“I genuinely think Sage Intacct is the best finance software I’ve ever used. The depth and power of the reporting make it a stand out system”

Mike Newton – Finance Director – L W Cole (Distributors) Limited
