

The background image of the top half of the page is a close-up, low-angle shot of the nose and cockpit area of an F-35 fighter jet. The aircraft is white with dark grey and black accents. The lighting is bright, coming from the right, which creates strong highlights and shadows, emphasizing the aircraft's angular and stealthy design. The jet is positioned diagonally across the frame, pointing towards the upper right.

## AIR FORCE BASE

---

### *Low Voltage Infrastructure System*

As Prime contractor for a large Air Force Base, Affigent was responsible for the base-wide installation and maintenance of the low voltage infrastructure system providing voice and data communications, and physical security to facilities supporting their Communications Squadron. This included Outside Plant (OSP)/ Inside Plant (ISP) copper and optical fiber cable connectivity, pathways, spaces, Protective Distribution Systems (SIPRNET/NIPRNET), Closed Circuit Television, Access Control, Video Teleconferencing, Information Technology electronics, Servers/Switches installation support and digital signage. Using a single streamlined procurement vehicle, Affigent successfully aligned on-site project management and brought 123 delayed projects up to date in the first 60 days of the contract. Affigent continues to provide ongoing assistance to the base for rapid response requirements for complex installations and logistical support projects.
