

## Flanks for Tech companies

### Challenge

Tech companies need access to high quality, standardised wealth data, fast. But connecting to dozens of institutions, handling inconsistent formats, and ensuring data quality adds complexity and delays product development.

### How we help

#### Aggregate

Flanks Aggregate provides a plug-and-play layer of wealth data infrastructure. We connect to banks, brokers and custodians across markets, and deliver normalised, structured data via API or flat files, ready to feed your backend, with no manual effort.

### Benefits

- ✓ Unlock access to untapped markets (global and local)
- ✓ Eliminate manual data collection
- ✓ Resolution for institutions that have 2FA (Two-Factor Authentication)
- ✓ Provide standardized, easy-to-consume data to customers
- ✓ Accessing real-time data on portfolio performance
