

CIVILIAN AGENCY

Data Center Storage and Servers Solutions

The technology services department of large civilian agency awarded a five-year contract for data center servers, storage, and peripherals and services to Affigent in 2007. This phased, multi-location deployment includes close ties with partners to manage help desk service calls, monthly reporting, and program management oversight. Value has been realized by combining all facets of a logistics and deployment plan, procurement method, and best-in-class technology quickly and cost effectively. Agency offices throughout the nation received standardized, supported servers and storage configured to their specific needs and pre-loaded with current software images. Ongoing nationwide support is provided for all users.
