

## Quickbooks Integration

**Challenge:** Many suppliers are using QuickBooks Desktop as their accounting software. They are having trouble putting external orders into the system and automating the invoice process.

**Solution:** EDI orders are posted into QuickBooks as sales orders. When these orders are shipped in TPSynergy, invoices are created automatically and posted to QuickBooks.

**Case Studies:** TPSynergy has helped many customers with QuickBooks integration.

- **Gemini Sound:** EDI orders from Amazon Vendor Central, Musician's Friend, Fry's Electronics, and BJ's Audio were automatically posted into QuickBooks
- **Endure ID:** EDI orders from Cardinal Health were automatically posted into QuickBooks
- **Madden Metals:** EDI orders and SKU numbers were posted automatically into QuickBooks
- **Freight Era:** Freight Era is a Freight Forwarding company using QuickBooks Online. We integrated their Supplier Freight invoices into QuickBooks as Bills. We also integrated the purchase orders created in QuickBooks for matching to the bills and Pre-authorize the bill amount before posing into QuickBooks
