Learn Practice Communicate

Learn Practice Communicate (LPC) is the first e-learning platform in Croatia, offering an innovative and rich learning experience.

Personal, yet universal; upon login, users enter a custom-made universe of knowledge, and are free to explore a wide range of learning opportunities. Users learn bite-size lessons and practice what they've learned via nine different types of quizzes and tests. These interactive activities include questions, images, and audio recordings linked together to help gain – and retain – knowledge.

Over the past 20 years, HalPet has been a go-to place for business education in Croatia and its neighboring countries. Their mission: to create new learning trends and provide a high level of expertise and innovation. The result is a redefined e-learning concept – Learn Practice Communicate (LPC) online.

Current users of the platform are banks, utility companies, and large enterprises utilizing the power of online learning, connected with WooCommerce for processing their course orders and membership levels. Approximately 5,000 users visit Learn Practice Communicate daily to learn new things – transition from one lesson to another is smooth and seamless.

Learning doesn't need to be something that has to be "added to our schedule". With LPC online, learning is fun and most importantly, brings lasting results.
