

Learn with Rohit

Rohit Singla is on a mission to help 100,000 college students achieve fulfilling careers through his digital coaching. And to help himself achieve this, he built his website using Thrive Theme Builder's **Omni Theme**. Rohit's website is a great example of a *personal brand* and uses some impressive features to really showcase his expertise, including customized audio blog post templates for his 'The Career Talk Show' podcast and embedded media player. We love Rohit's clean, professional website built with the tools inside Thrive Suite.

We love these features...

Save time with Omni Theme SMART landing page templates

Rohit has tweaked and customized the **Omni Theme's** SMART landing page templates to fit his brand and business, saving him tons of time to focus on growing his content and customers.

Omni Theme

Eye-catching animated headlines with TypeFocus effect

TypeFocus animations allows Rohit's website to show headlines that appear to write themselves, directly on the screen! This can be a great way to draw attention to his unique selling point and audience's needs.

Thrive Theme Builder

Show off podcast episodes with dedicated audio format blog posts

What works for a written post doesn't always work best for audio... that's why Rohit uses superb **audio-specific blog post templates** to promote his podcast episodes, complete with an embedded media player so visitors can listen right there on the page.

Thrive Theme Builder

I have been using Thrive Suite for more than a year now and my experience with it has just been phenomenal. I don't see any other tool offering these kinds of features at this time.

Thrive has definitely taken my business to the next level. I got started with Thrive Themes on a recommendation from one of my great friends and mentor. After that, I launched my own Program BYOW (Build Your Own Website).

Now I am training doctors and business owners across India on how they can Build Their Own Websites using Thrive Suite.

Thrive has been one of the gamechanging things that happened in my life. I'm so happy & grateful that I invested in Thrive Themes for my business.
