

Find out how TruckLogics helped this leased operator manage his settlements and expenses with a comprehensive solution

Challenge:

A leased operator was having a hard time tracking expenses and settlements from a highly reputed carrier. He was also struggling with figuring out his trucking business's financial status, and seemed to spend more time on settlements than on running the business.

TruckLogics' Solution:

- ⊗ Leased operators can import the settlements from their carrier directly into TruckLogics from their registered email address and create settlements automatically.
- ⊗ Track income and other expenses in just a few clicks.
- ⊗ Generate year-end tax reports easily and figure out the overall performance of the business.

Result:

TruckLogics' **Carrier Settlement** feature improved the operating efficiency of the leased operator's business. With **income** and **expenses** tracked seamlessly in their corresponding tax categories, the leased operator can generate a **Year-end tax report** with high accuracy!

Customer Stories

“ As a Leased Operator, I have used several trucking software and services but TruckLogics is the best I have ever used to manage my Carrier Settlement. They have the complete integrated trucking solution to simplify my entire process ”

- John, Leased Operator
